Career Objectives

I completed diploma from computer engineering department and I learned various programming languages like Java, Advance Java, Data Structure, Python etc. in diploma and also I used those languages for Android Application Development and work on many projects which was helpful for building my career in software development. But now I am enjoying JAVA and want to make a career in software

Programming engineering field. I am a result oriented and motivated computer engineer looking for an opportunity to work with a reputed organization where I can utilize my skills in coding and work with a team that can enhance my knowledge and skills as Software Engineer. Which is beneficial for me and my team and also for the company in which I work. I give my 100 percent for the company growth and try to complete all my work on time also always think for company growth. And I always give first priority to my work.
